

SilSafe™

suture cassette patented technologies

New **SilSafe™** Proprietary Technology
Minimizes Bacterial Migration (Wicking)

without **SilSafe™**

SilSafe™

- Reduces risk of cross contamination
- Creates a safe zone around cassette
- Shields suture and cassette from bacterial migration

Protects Cassette with Silver

- Sustained release of silver ions combats bacterial and fungal growth
- **SilSafe™** effectively inhibits the growth in vitro of 150 clinically isolated microorganisms, including aeruginosa and antibiotic resistant strains

New **SilSafe™** available in all CP cassettes

Patent No. 5,765,740; 5911,829; 6,095,323 and other patents pending
