

Surgical Steel

Surgical Stainless Steel Suture

- Stainless steel suture is the most inert among all suture materials and provides maximum tensile strength.
- Stainless steel suture is indicated for use in abdominal wound closure, intestinal anastomosis, hernia repair, sternal closure and also for certain orthopedic procedures (cartilage or tendon repair).

Needle Reference Chart	
Conventional Cutting-Sternum	
1/2 Circle	
	NCCS 48 mm
Soft Cut	
1/2 Circle	
	NV-40 48 mm
	NV-56 48 mm
